

SAFETY FIRST!

Is everyone Ready for Winter?

If road conditions are poor, do you really need to travel?

Designated Arterial and Emergency Route roadways and the Downtown core are marked in red and take first priority during snowfall events! Snow plowing operations will be ongoing, with second priority going to routes marked in yellow; industrial and commercial routes, school areas, and remaining residential areas as deemed necessary. If you typically park your vehicle on the street and are going out of town or leaving for an extended period of time this winter, please find alternative parking before you go. If snowfalls are anticipated, residents are asked to be proactive and remove their vehicles from the street during business hours until the snow has been cleared off the road. Town crews strive to remove snow efficiently and clear routes as quickly as possible.

Every snowfall is unique! Town crews endeavor to follow work procedures and priorities for snow removal and sanding in the Town of Taber. In order to enhance safe traffic movement and provide satisfactory driving & walking surfaces, crews are out whenever reasonably possible using the resources that are available. We thank all citizens for their patience while we do our best to clear snow.

Winter Check List

- Are your tires good for Winter Driving?
- Is your Block Heater working?
- Clear car windows before you drive!
- Drive according to conditions!
- Do you have a winter Survival Kit?
- NO extension cords across Sidewalks!

Residents are asked to do their PART!

Snow and ice can seriously impair the ability of people to get around safely. In accordance with By-law No. 6-2018, we ask you to please remove any snow or Ice from your sidewalk or driveway crossing within 24 hrs of snowfall. Failure to do so may result in a fine.

Winter TIPS for Pets

Not all pets are "fine" when left outside and unsupervised without a heated shelter. Just because your dog has fur, it does not mean he/she can withstand the cold. Do not leave your pets in a cold car for long periods as it acts like a refrigerator. Leave them safe at home when you go shopping. Fresh water is a must at all times. Pets do not get enough water from eating snow.

Driver SAFETY!

The Town of Taber asks residents to remain a minimum of 3 metres (10 feet) away from any snow removal and/or sanding equipment for the safety of both the residents and the operators. This setback includes driving close as well as attempting to pass any snow removal and/or sanding equipment.

ENJOY over 6 km of paved Trails this Winter!

The Town strives to clear 6 plus kilometres of trails during the winter for pedestrian safety. Please note that these trails are deemed as lower priority during a snow event and will be cleared when staff and equipment are available to do so. For all priority maps visit www.taber.ca.
